Mexican Resurrection
Plant

almost nothing when bought in quantities. This Miracle of Nature appeals to old and young, ideal for a green table fern. Simply place in water and within a few hours it unfurls a bright

living green fern. Change water ever few days. The nature of this plant is curious, it grows in the driest parts of the Southwest, and only comes to life every time it snows or rains, then it dries up again, going to sleep until moisture awakens it up. To live a lifetime use it accordingly to the nature of the fern, (ever few days take out of water and let it die).

No. 2 Size \$10.00 per M., Express pa'd by us
1000 Large, Prepaid to Your Depot \$14.00
Sample, 3 by mail 25c

TRIO ON WAGON AFTER LOOK AT JUMPING BEANS

(El Paso Herald)

Terrors of pink elephants, red snakes and other imaginary creatures, which haunt the more alcoholic reveries of those who find their way to the "wet" side of the Rio Grande, are nothing compared to the horrors of athletic, commonly known as jumping beans.

Take it from those who know—a trio of effete easterners to whom the mystreies of borderland flora and the strength of Juarez thirst quenchers are new.

The three easterners, delegates to the postal convention, found themselves gathered about a table in a room at Hotel Paso del Norte yesterday, after a sightseeing tour across the river.

The sight that confronted the three on the hotel table was more amazing, not to say unnerving, than any they had seen in Juarez.

For, in their absence, a jokester had placed a handful of jumping beans on the table in their room.

One long terrifying minute the El Paso visitors watched the antics of the gymnastic beans, then the silence was broken by three unearthly screams.

When last seen the three were said to be looking for someone who could supply them with W. C. T. U. pledge cards.

These beans come on in the fall. You can place orders any time, and when they come in we will mail at once. Sample 10c; 6 for 35c, postpaid. Write for quantity prices.

New Water Fern

BEAUTIFUL HOUSE PLANT—REQUIRES NO SOIL

Thrives in
a vase
of water

A peculiar and interesting plant that is admired by everyone; handsome, velvety, fine, fern-like foliage. Curls up and goes to sleep when taken out of water, and keeps in its sleeping or dormant state for weeks and awakens again in a few minutes after being placed in water. Owing to the fact it is capable of sleeping and awaking repeatedly, it is called the Opossum Fern. Do not confuse this plant with the much advertised

Resurrection plant. If you want one of the most satisfactory and beautiful "Table Ferns," something entirely new, get one of these marvels of plant life. Plants 25c each; 3 for 50c; 7 for \$1.00, postpaid.
